| R & R Backhoe Dozier & Septic Service        | (334) 618 - 7464 |

### \*Footnotes

1. Grease Waste Hauler companies pump/clean the grease control equipment containing **brown grease**. This type of grease is not to be confused with **yellow grease** which is used cooking grease such as used fryer oil and that produced by a griddle or rotisserie.
2. **Brown grease** is a result of culinary washing in sinks/dishwashers, and that from mopsinks, canwashes, prep sinks, floor drains in the kitchen area, etc. Brown grease is therefore contaminated with water, food waste, cleaning chemicals, etc. and is contained within grease control equipment (such as a small grease trap in the kitchen or large tank in the ground outside) which is connected to the building's plumbing. Brown grease is generally not recycled. Brown grease companies are referred to as **Grease Waste Haulers (GWHs)**.
3. Yellow grease is a commodity which the recycle company will purchase from a food service establishment (FSE), as opposed to brown grease removal for which the FSE must pay.
4. The City of Dothan does not endorse a company or their service. This list is provided as a service to the FSE and is subject to change.
5. Some companies offer both yellow grease and brown grease service.
6. Please contact the Fats, Oils, and Grease (FOG) Program at (334) 615 - 4454 for additional information or to be added to the list.
